## About Me

Hi! I am a Computer Science for Digital Communication student at the University of Milan. I am passionate about technology, computers and software, and I enjoy exploring new solutions to solve practical problems. Among my interests are also video games and transportation vehicles, with a particular focus on innovations such as autonomous driving and intelligent systems applied to mobility.

I am also passionate about self-managed systems. I have chosen to personally host this website at my home and manage various self-hosted applications. This experience allows me to explore technological infrastructures more deeply and develop practical skills that I consider fundamental.

My goal is to deepen and share the knowledge I acquire, so that I can contribute to projects and sectors that I am passionate about, with a particular focus on advanced technological solutions.

## Skills

### Frontend

HTML5/CSS3 JavaScript React  
React Native Bootstrap

### Backend

Node.js Python PHP Java  
Kotlin C Go

### Database
